DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?

Applying book preview functions were not that hard as I did abstract some of the function using modular.

_____

2. What parts of encapsulating your logic were hard?

Encapsulation was way too hard for me to understand. I coudnt be able apply to it on the functions I used and how to organise it.

_____

3. Is abstracting the book preview a good or bad idea? Why?

It was a good idea.Using abstraction is solution to a complex problem as code become manageable and readable.Without abstraction the code is harder to understand.

_____
